Vineyard

Sustainable viticulture / Terra Vitis certification: spontaneous grass cover between the rows to control the vigour of the plant, mechanical soil tillage for weed management, organic fertilizers and testing of green manure, stopping anti-botrytis products (grey mould), insecticides and CMR substances, planting hedgerows to encourage biodiversity, planting vines from massal selection and long-gone local grape varieties (Genouillet), converting a third of the vineyard to organic viticulture.

Terroir

Les Coignons in Reuilly: vines planted in 2010 et 2011 on kimmeridgian clay and limestone.

Harvest 2025

Scorching and early bird! After 2024, which was a trying year for many winemakers, 2025 came as a relief! A very early bud burst around April 7th put us on our guards for possible drops of temperature and, hurray, not one bit of frost. First obstacle avoided! Then, little, let even no pressure due to cryptogamic diseases of the vine, there were less than 6 treatments in 2025. There was indeed little water from May to end of August and a succession of heatwaves, which rank this vintage as one of the most solar years in the past 2 decades.

The vendanges began on August 26th with the harvest of the Pinots Gris and Noir: the quality of the wines will pretty sure be excellent! The Sauvignons were as ripe as can be, even though they suffered more due to shot berries and water stress.

Vinification

- This manual harvest is brought to the cellar in small cages.
- Vatting in successive layers of whole bunches (35%) and unstemmed grapes.
- Alcoholic fermentation (AF) in temperature-controlled stainless steel tanks, punching down.
- De-vatting before the end of AF (one week to 10 days of maceration).
- Bottled in March 2026, cuvée of 1,977 bottles.
